Mrs. Pig shopped for candy in the morning. The cashier at register #1 rang up the candy in this order: 1 Pound O' Pumpkins at $2.59, 1 Ghouly Drops at 97¢, and 1 Papa Monster Bar at $4.29. Later in the day Mr. Pig also bought the same candy. Only the cashier at register #5 rang up the candy in this order: 1 Ghouly Drops at 97¢, 1 Papa Monster Bar at $4.29, and 1 Pound O' Pumpkins at $2.59. Was Mr. Pig's bill different from Mrs. Pig's bill? Explain.
